IKEDINACHI OGBONNE

SOFTWARE DEVELOPER | PROJECT MANAGER

Enugu, Nigeria | ikedinachiogbonne@gmail.com | github.com/Ikedi-21
linkedin.com/in/ikedinachi-ogbonne-81129539b | ikedinachi-ogbonne-portfolio.vercel.app

PROFESSIONAL PROFILE

Software developer and project manager, and founder of GroTec, a five-person digital engineering studio. Coordinates software delivery from discovery through production deployment and works across web applications, APIs, databases, and payment integrations. Technical experience includes Python, Django, FastAPI, React, PostgreSQL, JavaScript, and Supabase. Also provides private tutoring in JavaScript and Python and is currently studying Computer Science.

PROFESSIONAL EXPERIENCE

Community Success Intern | **DukaDesk** | 2026 to Present

- Conduct user research and community success activities, turning user insights into input for product, acquisition, and operations teams.
- Engage community members to understand user journeys, pain points, and onboarding friction.

Founder and Project Manager | **GroTec** | 2026 to Present

- Lead a five-person digital engineering team and coordinate client engagements from initial discovery through production deployment.
- Oversee technical architecture and software development across web frameworks, APIs, and cloud databases.
- Coordinate engineering workflows and project roadmaps using Scrum and Notion.

Event Organiser | **DevTalk, hosted by Aptech** | June 2026

- Organised the agenda, developer engagement sessions, and technical discussions for an in-person developer community event hosted by Aptech.

Private Tutor | **Self-employed** | Ongoing

- Provide tutoring in JavaScript and Python.

SELECTED PROJECTS AND WORK

Selected software projects showing application development, workflow design, database use, third-party integrations, and user-interface work.

LUMEN | React 19, Vite, Supabase, Paystack
https://lumen1-mu.vercel.app
- Built a discovery platform for movies, books, manga, and comics.
- Includes role-based access, a coin wallet, and server-verified Paystack payment flows.

Athenaeum-Ikedi | Python, Django
https://athenaeum-ikedi-production.up.railway.app
- Developed an academic library management system for managing book borrowing workflows.
- Includes atomic borrowing transactions, hold queues, fines, and audit logging.

IJ-Drives | JavaScript, Google Maps, IndexedDB
- Designed a multimodal Nigerian transport marketplace concept covering land, sea, air, and rail transport.
- Includes interactive booking flows, with Google Maps and IndexedDB among the listed technologies.

StylishStrokes | React, Vite, Tailwind CSS
- Worked as lead UI designer on a five-person team building a calligraphy archive.
- The project includes an interactive stroke engine and a live tracing tool.

TECHNICAL SKILLS

Programming languages: Python, JavaScript, TypeScript, HTML/CSS. Working knowledge of Java and C#.

Frameworks and frontend: Django, FastAPI, React, Tailwind CSS, Vite.

Databases and integrations: PostgreSQL, SQL, Supabase, REST APIs. Working knowledge of Redis.

Tools and delivery: Git, GitHub, Docker, Vercel, Railway, Notion, Scrum.

Currently learning: Dart, Flutter, Spring Boot.

EDUCATION AND CERTIFICATION

Computer Science | University of the People | In progress

Advanced Diploma in Software Engineering | Aptech Learning Centre | Expected 2027

Data Analysis Certification | Coursera
